

Approved Cleaning Chemicals for Pall Oenoflow™ Filtration System

Pall Corporation has compiled the following list of approved cleaning chemicals for use with Oenoflow systems based on its own compatibility assessments. The products on the approved cleaning chemicals list have demonstrated an acceptable level with respect to performance and compatibility. This record has been established over a period of several years in multiple locations globally.

The table below shows the current list of approved cleaning chemicals for Oenoflow Systems and the maximum concentrations and maximum temperatures for their use.

Use of chemicals and/or products that are not on the approved cleaning chemicals list will void the warranty on the system and/or its filtration modules.

Products with a similar formulation may also be considered for use only if this compatibility is verified and confirmed in writing by Pall.

Please reach out to the SLS Global Technical Support Group for assessment of such chemicals.

Pall is not responsible for the composition/concentration of the chemicals referred to below and it is the responsibility of the customer to inform Pall if these values have changed. Use of all chemicals below must be done in compliance with all applicable local safety rules and regulations.

Intended Use	Supplier	Website	Product Name	Product Number (where available)	Max Concentration	Max Temp. (°C/°F)
Acid for preservation/neutralization	Perdomini-I.O.C. Spa	www.perdomini-ioc.com	Detar 10		0.50%	25/77
Acid for preservation/neutralization	Tensid-Chemie GmbH	www.tensid-chemie.de	WEICOSIL-SP ¹		0.50%	25/77
Acid for preservation/neutralization	Wigol W. Stache GmbH	www.wigol.de	Microl P CF S	412842	0.50%	25/77
Acid for preservation/neutralization	Ecolab	www.ecolab.com	P3 Ultrasil 75 ²		0.50%	25/77
Acid for preservation/neutralization	Diversey	www.diversey.com/en	DIVOS 2 VM13 ³		0.50%	25/77
Acid to remove calcium deposits	Perdomini-I.O.C. Spa	www.perdomini-ioc.com	Detar 10		1-2%	50/122
Acid to remove calcium deposits	Ecolab	www.ecolab.com	P3 Ultrasil 75		1-2%	50/122
Acid to remove calcium deposits	Diversey	www.diversey.com/en	DIVOS 2 VM13		1-2%	50/122
Alkaline cleaner	Perdomini-I.O.C. Spa	www.perdomini-ioc.com	Detar Flow		1%	55/131
