

# Retrofit for Dollinger liquid/gas Coalescer

PIDOLLGENa

**Pall's liquid/gas coalescer technology is available as a direct replacement of Dollinger liquid/gas coalescers to protect equipment including compressors and turbines, amine sweetening, desiccant and catalyst beds.**

Pall's retrofit products allow users of other manufacturers' elements to benefit from Pall technology without the need to replace the existing housing/vessel. Pall retrofit products are direct replacements for existing elements, offering the performance and value you have come to expect from Pall.

## Advantages of Pall Technology

Pall's filter media and element designs bring together industry leading technologies and advanced manufacturing processes to deliver unsurpassed performance and value (e.g. long service life and reduced amine loop foaming) in each and every element.

## Pall Retrofit p/n

### **RDLLG430GFV**

*Replaces:* Dollinger p/n: 79-1906

### **RDLLG424GFV**

*Replaces:* Dollinger p/n: 79-1198

## Specifications

- Efficiency: 1 ppbw by modified CAGI-400
- Capture Efficiency: 99.96% at 0.3 micron
- Max Temp: 180°F (82.2°C) with no water  
140°F (60°C) with water present
- Element Burst: > 30 psid (2.07 bar)
- Element Weight: 4.5 lbs (2.04 kg)
- Materials of Construction:
  - Medium: Glass Fibre
  - End Caps: Stainless Steel
  - Core and Outer Cage: Tin Plated Carbon Steel
- Full element surface treatment for rapid liquid drainage

## Global Presence — Local Support

Pall is a global company with offices in Asia, Americas, Europe, and the Middle East. This global presence gives us the ability to provide local commercial or technical support whenever or wherever there is a customer need.

Length	Part Number
24.76 [628.9]	RDLLG424GFV
30.76 [781.3]	RDLLG430GFV

## Quality Note

Pall retrofit coalescers are manufactured at Pall sites that are ISO9001 certified.

They are traceable back to manufacturing lots by date code printed on the bag label.
