

New: Retrofit for Pentair Compax Filter Element

Introducing Pall's 'direct replacement' filter technology for users of Pentair Compax filters for refinery hydrocracker protection

Pall's new retrofit products allow users of other manufacturers' elements to benefit from Pall technology without the need to replace the existing housing/vessel. Pall retrofit products are direct replacements for existing elements, offering the performance and value you have come to expect from Pall.

Advantages of Pall Technology

Pall's filter media and element designs bring together industry leading technologies and advanced manufacturing processes to deliver unsurpassed performance and value in each and every element.

Pall Retrofit p/n: RPNF540GF50V

Replaces: Pentair p/n: FMC6240MXGSVH

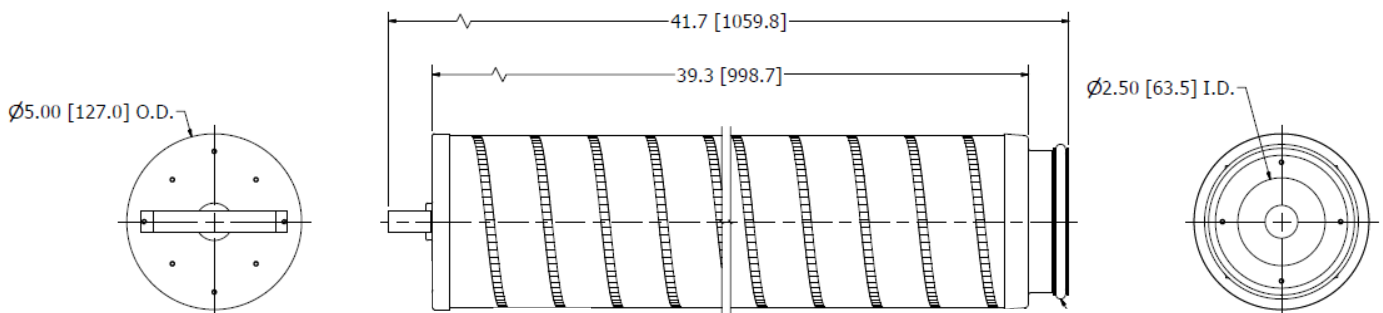

Specifications:

- Up to 2x service life (depending on application)
- LOP construction with out-to-in flow direction
- 50 micron nominal rating
- Microglass medium
- 304 stainless steel end caps
- Fluorocarbon o-ring
- Max operating differential pressure: 40 psid (2.8 bar)
- Max temperature: 400°F (204°C)

Global Presence – Local Support

Pall is a global company with offices in Asia, Americas, Europe, and the Middle East. This global presence enables us to provide local commercial or technical support whenever or wherever there is a customer need.
