

UltiKleen™ G3 HiT KC Assemblies

UltiKleen™ G2 HiT KC Assemblies

Data Sheet MEHITKCENb

Description

The UltiKleen HiT KC Assembly is specially constructed with proprietary fluid flow path improvements, for reliable high particle removal efficiency in severe chemical service conditions, found in high temperature SPM applications.

Designed for critical single pass point-of-use retention requirements, the UltiKleen HiT KC Assembly provides a high flow rate that makes it suitable for recirculation bath applications as well.

The improved non-dewetting property help enable semiconductor makers to meet the critical chemical process filtration requirements beyond 32 nm manufacturing. Pall's advanced ultra low extractables, Me-KleenSM K7 post treatment process is also available to reduce metal ion extractables to a low single digit ppb total.

The UltiKleen G3 KC T-flow assembly has a slightly larger diameter than the UltiKleen G2 KC T-flow assembly, but it has the same face-to-face sealing distance.¹ This makes interchanging assemblies easy. The increased diameter of the G3 assembly contains a larger format UltiKleen Excellar ER filter with increased filter area and robust supports for higher flow rates and longer service life.

UltiKleen G3 HiT KC Assemblies (T-flow)

UltiKleen G2 HiT KC Assemblies (T-flow)

Features & Benefits

- Enhanced retention of particles in high temperature
- Greater than 95% retention of 15 nm gold colloids
- Large nominal filter area of 2.6 m² / 28 ft²
- High flow rates
- All ultra high purity fluoropolymer construction
- Low extractables (Me-KleenK7 option is available)
- 100% prewetted with ultrapure water in package
- Downstream core vent reduces potential for bubble collection and premature blockage

Specifications

Materials of Construction

Components	Materials
Filter Medium	Surface modified PTFE
Media Support	PFA / PTFE
Inner Core	PFA
Outer Cage	PFA
End Caps	PFA
Housing	PFA

Product Name	UltiKleen G3 HiT KC Assemblies		UltiKleen G2 HiT KC Assemblies	
Removal Ratings	30 nm	15 nm	30 nm	15 nm
Nominal Filter Area	2.1 m² / 23 ft²	2.6 m² / 28 ft²	1.3 m² / 14 ft²	1.7 m² / 18 ft²
Configurations	T-flow, In-line		T-flow, In-line, L-flow	
Maximum Operating Temperature	180 °C / 356 °F			
Maximum Operating Pressure	0.5 MPaG (72.5 psig) @ 25 °C (77 °F)			
	0.4 MPaG (58.0 psig) @ 60 °C (140 °F)			
	0.35 MPaG (50.7 psig) @ 90 °C (194 °F)			
	0.20 MPaG (29.0 psig) @ 120 °C (248 °F)			
	0.15 MPaG (21.8 psig) @ 150 °C (302 °F)			
	0.12 MPaG (17.4 psig) @ 180 °C (356 °F)			

¹ With same connection size. G3 length slightly longer. See dimensions below.

Typical Flow Characteristics - 1cP fluid, 20 °C
